# **Product Designer**

## **Work Experience**

# Beat / Product Designer

December 2021 - Present

**Portfolio** tannaz.me

Beat is a ride hailing service focused in LatAm with more than 25 million users. As one of the designers in the passenger's domain things I'm doing include:

- Integrated address and editing in the pickup pin on the map at the beginning of the flow, which resulted in
  reduction of passengers changing their pickup address from the Trip Confirmation screen by 12% and
  cancellation due to incorrect pickup by 3%. Link
- Overhauled the Favorite Address feature by adding shortcuts for passengers to manage, add, and edit their
  favorite addresses on the Search and Profile screens and it was expected to increase the number of rides
  with a favorite address as destination. <u>Link</u>
- Designed a modular landing screen in coordination with the development team to provide a scalable design
  capable of showing features, services, and promo codes based on market needs, localization, and
  personalization to support the business strategy.
- As a member of the **Design System** team, I worked on the foundations, which increased design and **development velocity** as well as forging a **common language** between design and development teams.
- Designed a readable and concise icon set and illustrations that replaced the old one that was confusing for users, resulting in more clarity and consistency throughout the product. <u>Link</u>

## Location

Amsterdam, The Netherlands

# Cafe Bazaar / Product Designer

February 2021 - December 2021

Cafe Bazaar is the most popular smartphone application marketplace in Persian-speaking countries, with over 40 million users. Here is a list of what I have done:

- As the owner of the **Design System**, I was responsible for extending and maintaining it, and ensuring that designs are aligned with it.
- **Redesigned** the Video service and its player to make **accessibility** a priority and to create a seamless experience aligned with other services of the app. <u>Link</u>
- Added the ability to allow users to request apps that aren't on Bazaar to reduce churn rate in the search funnel.

## Tools

Figma, Sketch, Adobe XD, Illustrator, Photoshop, Principle, Zeplin

# **Snapp!** / Product Designer

September 2019 - February 2021

Snapp! is known as the Uber of Iran with more than 2 million daily rides and more than 40 million users. As the owner of the Passenger's experience, things I did include:

- Designed Change Destination feature in the passenger app which resulted in a 2% reduction in daily Customer Center tickets, and also reduced canceling and rebooking. <u>Link</u>
- Redesigned the Corporate Panel, which led to increasing B2B rides by 15%.

### **Skills**

Prototyping, Wireframing, Visual Design, UI Design, User Research, A/B Testing, Usability Testing, User Flows, Design Systems, IA

## Hami System Sharif / Product Designer

July 2018 - August 2019

Hami System Sharif's main focus has been carrying out the largest deal of Hamrahe Aval, Iran's first and largest mobile operator, software related projects. Things I did include:

• Designed and prototyped a completely new UI for Hamrahe Aval's App.

### **Education**

Azad University Central Tehran Branch

2013 - 2017

Bachelor's Degree, Visual Communication
