WORK EXPERIENCE

bol.com

Senior Product Designer

Mar 2023–Present

Utrecht, Netherlands

bol's own retail business, with internal tools and supplier-facing products supporting its commercial operations.

- Established the design practice within the **Retailer1 domain as its first Product Designer**, introducing research, discovery, prototyping, and validation into product development and helping grow the design team.
- Led discovery and design across **Product, Engineering, Business, Category Managers, and Suppliers** for a new B2B promotions service spanning multiple systems, contributing to **3,046 hours in annual time savings** and finishing **10% above the time-saving target**.
- Shaped the product vision with **Business, Product, and Engineering** for a new promotion mechanism, using journey mapping to identify reusable settings that could reduce the average **14-hour setup time by ~36% per promotion**, while balancing the future vision with an iterative MVP.
- Led discovery across **internal and supplier-facing claims workflows**, aligning business needs and technical constraints into a new claims management service that streamlined manual work and saves approximately **~4 hours per week**.
- Improved usability across two internal products by systematically addressing UX debt and introducing common UX patterns; for the **promotions tooling, SUS increased from 57 to 73**.
- Helped scale the design team, contributing to the hiring of 10 Product Designers and interviewing and evaluating candidates throughout the recruitment process.

BEAT

Product Designer

Dec 2021–Dec 2022

Amsterdam, Netherlands

Ride-hailing platform serving 25M+ users across Latin America.

- Redesigned the passenger pickup experience, reducing pickup-address changes at Trip Confirmation by **12%** and cancellations caused by incorrect pickup locations by **3%**.
- Designed a scalable, modular landing experience supporting market-specific features, services, promotions, localization, and personalization.

Cafe Bazaar

Product Designer

Feb 2021–Dec 2021

Tehran, Iran

One of the largest Android app marketplaces in the middle east, serving 40M+ users.

- Owned and evolved the **Design System**, creating consistency across experiences as the platform evolved.

Snap!

Product Designer

Sep 2019–Feb 2021

Tehran, Iran

One of the Middle East's largest ride-hailing platforms, handling 5M+ rides per day.

- Designed the Change Destination experience, **reducing daily Customer Center tickets by 2%** while reducing cancellation and rebooking.
- Redesigned the Corporate Panel, driving a **15% increase in B2B rides**.

Hami System Sharif
